FEPCO

FEPCO for Integrated Engineering Projects

A premier General Contracting and Specialized Engineering firm delivering **pioneering infrastructure solutions** for the **Energy, Oil & Gas, and Petrochemical Sectors.**

General Contracting
End-to-end execution with uncompromised quality and safety.

Specialized Engineering
Tailored engineering solutions driven by innovation and expertise.

Energy, Oil & Gas Solutions
Reliable and efficient solutions for complex energy challenges.

Petrochemical Excellence
Advanced engineering for a sustainable and productive future.

Established 2019
— Oil & Gas Engineering —

WHY PARTNER WITH FEPCO?

Highly Specialized Expertise

Unlike standard builders, we excel in demanding niches such as Automatic Tank Cleaning, Roof Air Raising, and API storage tank setups.

Strict Safety Culture (HSE)

Safety is non-negotiable. Every team member conforms to the rigorous safety requirements needed to operate in volatile petrochemical locations.

ISO Certified Systems

FEPCO is structured around systematic QA/QC guidelines. We carry premium certifications guaranteeing process execution standards.

Uncompromising Teamwork

We work tightly alongside client engineering departments from conceptual design through execution to deliver within budget.

WHO WE ARE

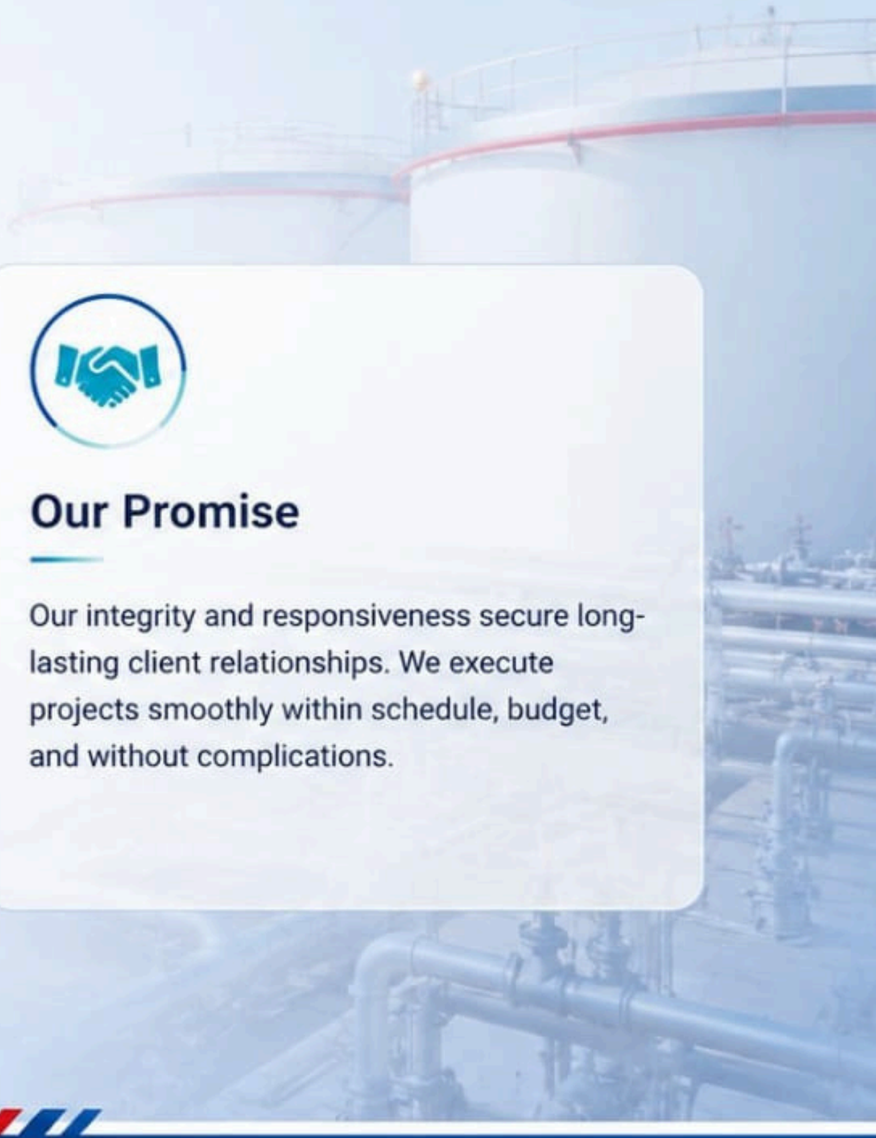
Our Legacy & Competence

Founded in 2019, FEPCO for Integrated Engineering Projects has established itself as an innovative force in the general contracting industry in Egypt.

We specialized rapidly in the complex demands of the oil, gas, and energy infrastructure segments, building a track record of executing turnkey structures to flawless international standards.

- @ Turnkey Solutions from Concept to Operations
- @ Uncompromising Quality according to ISO & API Standards
- @ Advanced Technical Execution Methodologies

OUR VISION & CORE VALUES



Our Vision

To be the trusted leader in mechanical contracting and critical services through advanced technologies, comprehensive personnel training, and industry-leading standards.

Our Mission

Delivering high-value engineering solutions via highly experienced design, execution, installation, and control personnel, ensuring timely and risk-free project completion.

Our Promise

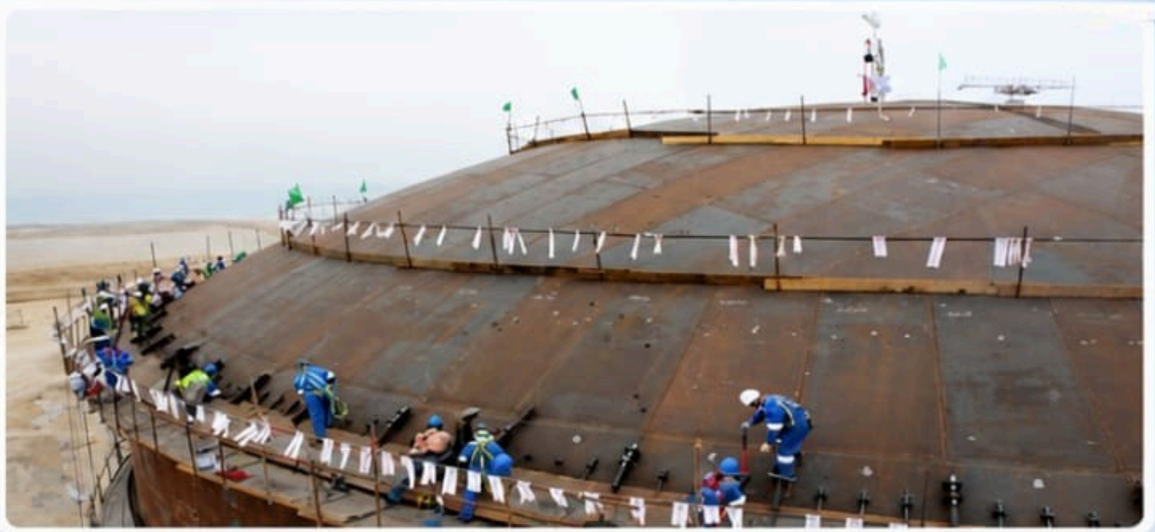
Our integrity and responsiveness secure long-lasting client relationships. We execute projects smoothly within schedule, budget, and without complications.

TANK ROOF AIR RAISING

Pioneering Roof Lifting Technologies

FEPCO is an established leader in the highly specialized Roof Air Raising technique used in the construction of storage tanks.

By utilizing air pressure to hoist prefabricated tank roofs to their final elevation, we drastically improve installation performance, speed up construction timetables, and eliminate crucial safety hazards associated with high-altitude assembly.

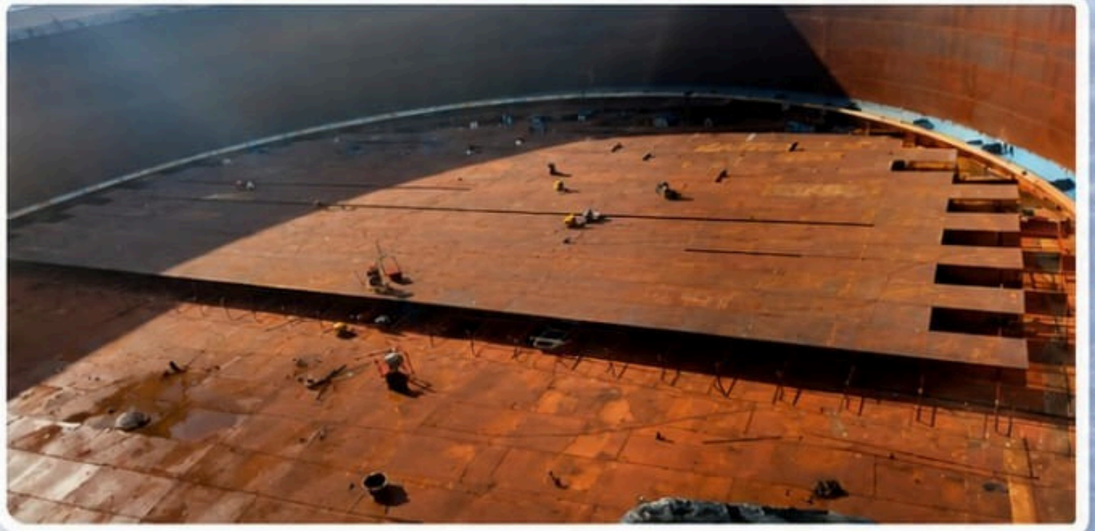


Tank Construction & Maintenance

FEPCO provides complete life-cycle solutions for above ground storage tanks, from new tank construction to maintenance, repair, rehabilitation, and mechanical upgrades. Our expertise ensures safe, reliable, and cost-effective execution while complying with international codes and client requirements.

Key Services

- New Storage Tank Construction
- Tank Rehabilitation & Upgrading
- Bottom & Shell Plate Replacement
- Roof Fabrication & Installation
- Structural Steel Works
- Tank Modification & Repair
- Hydrostatic Testing
- Mechanical Completion & Commissioning



Piping & Pipeline Construction

FEPCO provides complete piping and pipeline construction services, from fabrication and installation to testing and commissioning, delivering safe, efficient, and high-quality solutions for oil & gas projects

.Core Capabilities

- Process & Utility Piping
- Pipeline Construction
- Welding & Fabrication
- Mechanical Tie-ins
- Pressure Testing
- Pigging & Flushing
- Commissioning Support

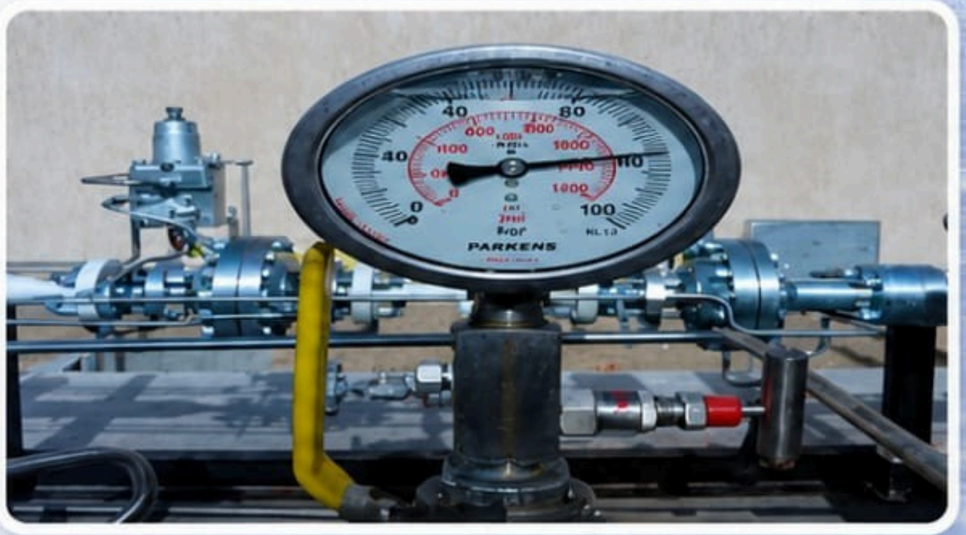
TESTING & COMMISSIONING

Ensuring Operational Readiness

We boast a dedicated team of engineers who bring decades of combined gas testing experience to guarantee safe operations from day one.

Our systematic protocols confirm that every mechanical component, piping line, and safety valve operates accurately under design pressures before commercial handover.

- Hydrostatic & Pneumatic Pressure Testing
- Flushing & Piping Pre-cleaning Procedures
- Pre-commissioning Inspections & Readiness Surveys



HSE& QUALITY

Safety and quality are at the core of everything we do. FEPCO is committed to delivering every project in full compliance with international standards, ensuring the protection of people, assets, and the environment while achieving the highest levels of quality and client satisfaction. Our Principles

- Safety First
- Quality Excellence
- ISO Certified
- Environmental Protection
- Continuous Improvement
